Thanks for info [redacted]

Is there a particular year/s that this course would be more suited for?

Kind regards

Ellaine

Hi Ellaine,
Here is the link to the VNA course.
http://www.hillsvet.com/zSkin_2/hlp/hlp_vna_index.jsp?FOLDER%3C%3Efolder_id=9852723697013386&CONTENT%3C%3Ecnt_id=10134198673464179&bmUID=1306368063274&bmLocale=en_AU

The students would need to register as veterinary students and after that it should be quite straight forward to proceed. The course is all online, and in three modules, We could have prizes for completion of each module, with a grand prize for the first student to complete all three. I would need to think about suitable prizes - any suggestions? Subsidising the student ball ticket has been used to effect at other unis, but we don't have to use that.
best regards,
[redacted]

Hi [redacted]

Thank you very much for the suggestions below.

I am investigating the possibilities of the speaker, and will hopefully get back to you soon regarding that.

We would love to take you up on the stethoscopes for the clinic coats ceremony.

Also the online course reward sounds like a lovely idea. Let me know how we can inform the students of this course and the award of course.

Hope all is well with you, and you're not doing too much travelling.

Best regards

Ellaine

Hi Ellaine,
Thanks for going over the terms of the Hill's contract with Mark Lawrie.
I have been contemplating your list of Special Projects and the items you suggest are fine with me.
I haven't come up with too many brilliant ideas for extending the in kind support unfortunately. While the student streaming placement is a

good idea in principle I don't think it would work in practice in Australia. The research and product development for Hills all occurs in the USA, and we don't have much to offer students locally that I can think of. Any ideas Mark?
Things that came to mind:
1. A distinguished speaker to give the students a block of lectures, and/or as development for clinical staff. Maybe someone to contribute to the Client Simulation classes?
2. Hill's branded stethoscopes (we have these and they are of excellent quality) that could be supplied to students at the clinic coats ceremony or the 5th Year Badge ceremony ($50 each)
3. Prizes for all students completing the online Hill's Veterinary Nutritional Advocate course (eg subsidising student ball ticket cost)
4. An additional student prize in nutrition in the pre-clinical years.

Would any of those work for you?
with best wishes,
[redacted]

Hi [redacted]

Absolutely, I'll fill Mark in on the Hill's sponsorship contract.

Attached please find the special projects fund suggestions to take us up to the end of our current contract. We are a little light on the in-kind contributions, and would welcome suggestions as to what you would see being included in this area.

Prof Hampson suggested that you may be able to support a final year student "streaming" placement with Hill's. Is this something we could investigate?

I look forward to hearing your thoughts.

Kind regards

Ellaine

Hi Ellaine,
Sorry to miss you while in Perth this past week, however no doubt I will be back.
I did have a meeting with Mark Lawrie however, and it became apparent that he is unfamiliar with the contract between Hill's and Murdoch. I was wondering whether you could find the time to go over it with him? It is certainly relevant to his areas of responsibility, and potentially more so if we move to funding a resident in nutrition.
Much appreciated, and my very best wishes,
[redacted]
