Hi [redacted]

Well, Registration Day is finally over, so now the mad catch up before Christmas hits. Gone are the days when the lead up to Christmas was a gradual wind down.

To answer your questions below:

1. MVSA – At the end of semester one, the MVSA and SIG's had a meeting and all the SIG's were on board with these changes. The two larger SIG's were concerned that this would affect their opportunities to gain sponsorship opportunities separately from this agreement however their concerns were addressed. An email has also been sent to the students from MVSA outlining these proposed changes, and there has only been positive feedback from the student body.
2. VPL – There is a VPL4 and VPL5 program. VPL4 consists of a series of lectures covering items such as communication, law, finance, networking, animal welfare, self care etc. There is the opportunity for Hill's to be involved in supporting VPL4 via an in-kind catering component, and perhaps a session of an appropriate topic. The lecture schedule for VPL4 is not finalised as yet. VPL5 encompasses the extramural clinical experiences that the students undertake. Next year there are plans to organise a workshop / social event for participating practices in order to communicate the new requirement for placement contracts. This would involve seminars, food, beverages and OSH training. This would be an area that Hill's could support, especially through in-kind catering.
3. Client Simulation Classes – The classes are coordinated by Dr Jennifer Mills. She would be pleased to discuss your suggestions below.

I hope this answers your queries sufficiently.

I look forward to hearing from you.

Kind regards

Ellaine

Subject: Re: Proposal

Hi Ellaine,
Thanks for the updated contract proposal. I think we are getting close! [redacted] and I had a meeting today on the proposed inclusions and have a few questions about some of its elements.

1. **MVSA**. What are the attitudes of the students towards these changes in the way MVSA operates? Have the changes and the nature of them been communicated to the students? Are they "on board" with the approach outlined in the proposal and detailed in the separate document you gave me? We are concerned that the Hill's brand is associated with an arrangement that the students see as being very positive.
2. **VPL**. Is VPL confined to 1st, 2nd and 3rd years? If there is a component of VPL in the latter years of the course, we would be interested in Hill's involvement.
3. **Client simulation classes**. Can you tell us who runs these classes? We would like to discuss how nutrition might be included, and believe that, rather than adding a Hill's diet to the scripts, information on how to make a nutritional assessment and recommendation, and discussion around nutrition as the 5th Vital Assessment (5VA) that should be performed on every animal every time it visits the vet, is a more appropriate approach. We have materials that we can share on 5VA developed by the American Animal Hospital Association and WSAVA.

Kind regards,

[redacted]

Subject: Proposal

Hi Maureen

Please find attached a revised proposal, taking into account our recent discussion.

If you have any queries, please let me know.

Kind regards
